

# Travel Insurance Data Analysis.

*Wireframe Documentation*

- Here is the Home page for the Dashboard where we have Slices by which we can filter the data by Gender.

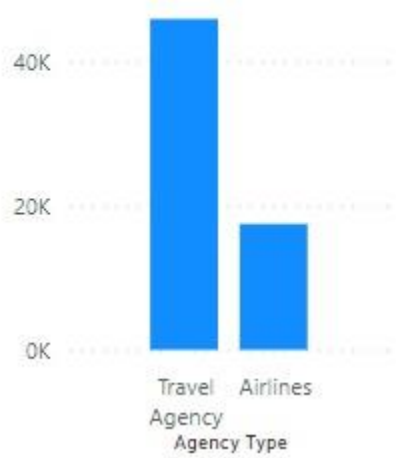

- Here we get the Number of product\_names by Destination.

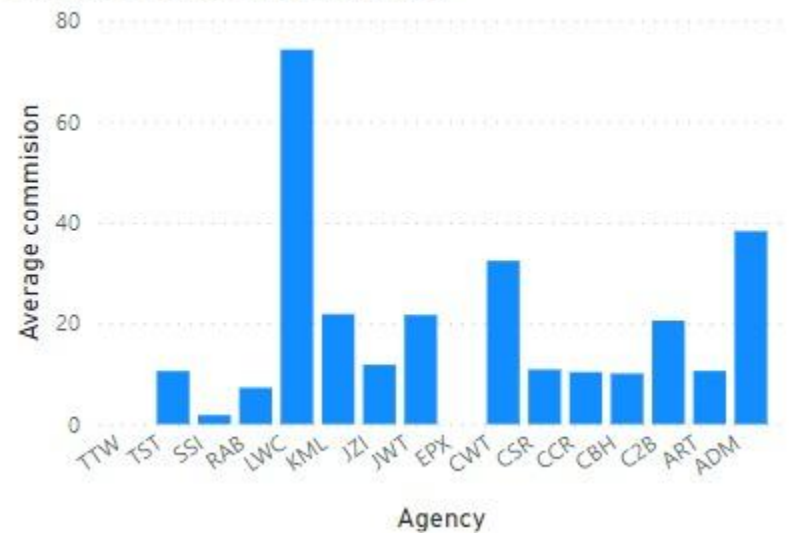

- Here we get the Claims by Agency and Average commission by Agency

Count of Claim by Agency Type

Average commission by Agency

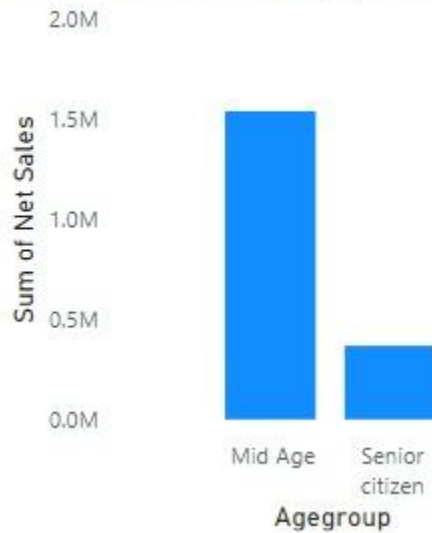

- Gender vs Distribution channel

Count of Gender by Distribution Channel

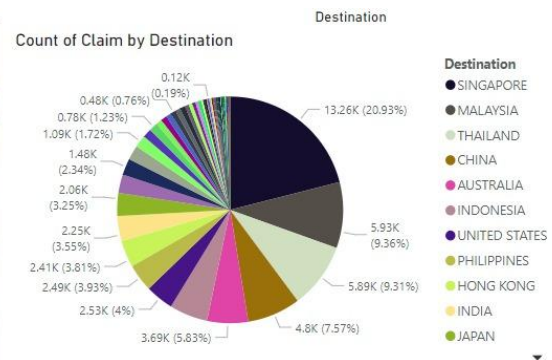

- Net sales by Age group.

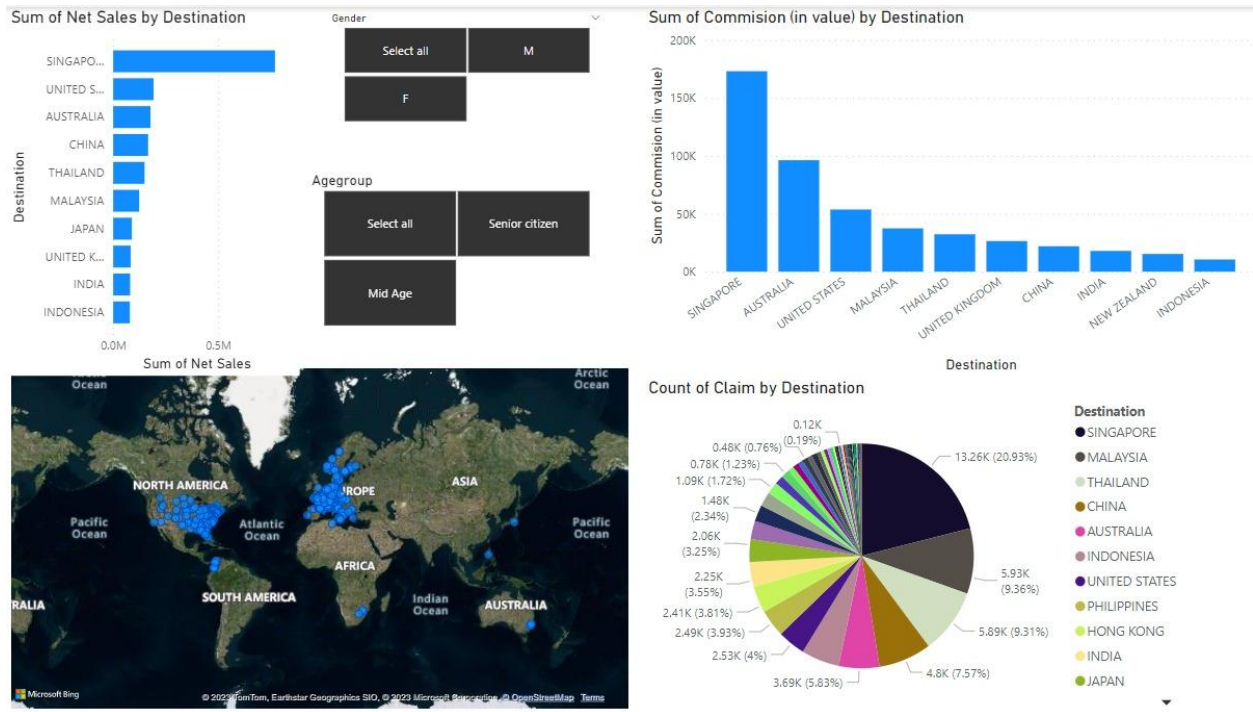

Sum of Net Sales by Agegroup

- Map shows the Distribution destinations and Count of claim by Destination

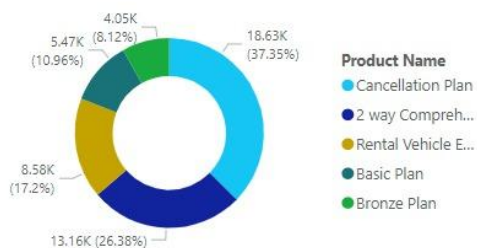

- Here is another filter by which we get Distribution country wise data for Net sales and Average commission value.

- Claims by product name and Top 5 Net sales by Product\_name.

Count of Claim by Product Name

Top 5 Product names by Netsales
